

## GASTRO **ECO**PRO

### the **Greenest Foodsafe** Refrigeration in the **World**

The Eco Pro range generates significant energy and carbon reductions in use saving you money on your operating costs whilst at the same time never compromising on your commitment to food safety. Built to the same high quality standards as all Foster products the Eco Pro provides excellence and practicality at a very competitive price.

*Super low energy consumption - highly efficient ECM fans combined with new refrigeration system design and Foster's Circularair air system deliver significant running cost and carbon savings*

*Low Carbon environmental footprint - 'natural' Hydrocarbon refrigerant, low energy consumption, through to product longevity and recyclability means Eco Pro will help your business to reduce its carbon footprint*

*Market leading capacity for best value - with over 10% more capacity compared to competitor equivalents, the cost per litre of storage space is lower, as are the running costs. The result you store more for less*

*Designed to save the user money - efficient operation in high ambients, fan cut out when the door is opened, heavy duty gaskets to reduce heat loss are just a few of the benefits - the high quality specification that lasts*

Authorised User No. 00101

Where you see this Energy Technology List symbol, these products are approved on the Carbon Trust's ECA (Enhanced Capital Allowance) Scheme. These products are guaranteed energy efficient delivering significant running cost and carbon emission savings - important as energy costs rise and businesses gear up for the Government's introduction of the CRC (Carbon Reduction Commitment) programme from 2010.

Importantly the Scheme allows businesses to claim 100% first year capital allowances on investments in energy efficient, ECA approved products against taxable profits. This currently amounts to a further 8.6% saving on the product's purchase price.
